PHILIP ONWUKWE

Independent Supply Chain Consultant

Find the cash hidden in your stock, suppliers and freight

I help small manufacturers and distributors cut inventory, purchasing and freight costs with fixed-price diagnostics delivered in 2–3 weeks.

Most growing businesses order by habit, hold more stock than they need, and pay freight rates nobody has checked in years. You send me your data. I send back a clear report showing where the money is and what to do about it.

Services

Each service is a fixed-price project with a written report and a walkthrough call.

Service	What you get	Price
Inventory and material flow diagnostic	ABC analysis of your stock, reorder points and safety stock for your key lines, a list of excess and slow-moving items, and the cash you can release	**From £1,500**
Freight cost audit	Your carrier rates and invoices checked against quotes, LCL vs FCL break-even for your import lanes, pallet and load improvements, and a savings estimate	**From £1,500**
Supplier and spend review	Spend broken down by supplier and category, a weighted supplier scorecard, a savings shortlist, and a ready-to-send quote request for your top categories	**From £2,000**

How it works

1. **Free 30-minute call.** We talk through your operation and agree which diagnostic fits.
2. **Fixed-price proposal within 24 hours.** One page: scope, price, and the data I need.
3. **You send the data.** Usually exports from your stock, purchasing or accounts system. A confidentiality agreement is signed first.
4. **Report in 2–3 weeks.** Findings, numbers and a prioritised action list, followed by a walkthrough call.

I work remotely. Calls are available at lunchtime and after 5pm on weekdays, and I reply to messages within 24 hours.

About me

I am a supply chain and procurement professional with an MSc in Logistics and Supply Chain Management from the University of Hull and around five years of hands-on experience.

- **Day-to-day material flow in manufacturing.** I keep a high-volume production line supplied across a large supplier base, releasing purchase orders daily.
- **Shortages caught early.** I use MRP signals to resolve shortages before they reach production, and forecast material consumption to support planning and purchasing decisions.
- **Supplier management.** I run regular performance reviews with key vendors and follow up overdue deliveries daily to protect production schedules.
- **Data tools.** SAP, Excel, Apple Numbers, Keynote and Pages.

My consulting work is independent of my employer.
